**State of Maryland
Office of Legislative Audits
Quality Control Review
For The Period April 1, 2008
Through March 31, 2009
Report**

National State Auditors Association

May 8, 2009

Mr. Bruce A. Myers, CPA
Legislative Auditor, State of Maryland
301 West Preston Street, Room 1202
Baltimore, Maryland 21201

Dear Mr. Myers:

We have reviewed the system of quality control of the State of Maryland, Office of Legislative Audits (Office) in effect for the period April 1, 2008 through March 31, 2009. A system of quality control encompasses the Office's organizational structure and the policies adopted and procedures established to provide it with reasonable assurance of conforming with government auditing standards. The design of the system and compliance with it are the responsibility of the Office. Our responsibility is to express an opinion on the design of the system, and the Office's compliance with the system based on our review.

We conducted our review in accordance with the policies and procedures for external peer reviews established by the National State Auditors Association (NSAA). In performing our review, we obtained an understanding of the Office's system of quality control for engagements conducted in accordance with government auditing standards. In addition, we tested compliance with the Office's quality control policies and procedures to the extent we considered appropriate. These tests covered the application of the Office's policies and procedures on selected engagements. The engagements selected represented a reasonable cross-section of the Office's engagements conducted in accordance with government auditing standards. We believe that the procedures we performed provide a reasonable basis for our opinion.

Our review was based on selective tests; therefore it would not necessarily disclose all weaknesses in the system of quality control or all instances of lack of compliance with it. Also, there are inherent limitations in the effectiveness of any system of quality control; therefore, noncompliance with the system of quality control may occur and not be detected. Projection of any evaluation of a system of quality control to future periods is subject to the risk that the system of quality control may become inadequate because of changes in conditions, or because the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the system of quality control of the State of Maryland, Office of Legislative Audits in effect for the period April 1, 2008 through March 31, 2009 has been suitably designed and was complied with during the period to provide reasonable assurance of conforming with government auditing standards.
